

GIA NATURAL COLORED DIAMOND REPORT

August 26, 2025
Report TypeGrading Report
GIA Report Number*****4341
Shape and Cutting StyleCushion Modified Brilliant
Measurements5.86 x 5.70 x 3.51 mm

Carat Weight1.01 carat
Color GradeFaint Pink
Color OriginNatural
Color DistributionNot Applicable
Clarity GradeInternally Flawless

PolishVery Good
SymmetryGood
FluorescenceNone
Inscription(s): GIA *****4341
Comments: Minor details of polish are not shown.

DIAMOND TYPE CLASSIFICATION FOR GIA COLORED DIAMOND GRADING REPORT
#*****4341

Scientists classify diamonds into two main "types" - type I and type II - based on the presence or absence of nitrogen which can replace carbon atoms in a diamond's atomic structure. These two diamond types can be distinguished on the basis of differences in their chemical and physical properties. Type II diamonds contain little if any nitrogen and they are subdivided into two groups (IIa and IIb) both of which are quite rare (reportedly less than 2% of all gem diamonds fall into the type II category).

According to the records of the GIA Laboratory, the 1.01 carat Cushion Modified Brilliant diamond described in GIA Colored Diamond Grading Report #*****4341 has been determined to be a **type IIa** diamond with pink color. Type IIa diamonds are very rare in nature, often have relatively few inclusions and are noted for their mostly homogenous color in the rough. Unlike many other colored diamonds, the color in pink diamonds can not only be caused by atomic level impurities, but it may also be a result of the diamond's exposure to heat and pressure during transportation into the earth's crust. Type IIa diamonds with pink color have been found in a number of mining regions around the world. Historically they were found in India (particularly from the Golconda region) and, in more recent times, most notably from Brazil and Africa.

The 70.39 carat Empress Rose and the 28.15 carat Agra are examples of notable type IIa pink diamonds.

The information specific to the article described in this document ("Information") is a part of the GIA Report referenced herein (the "Report") as if such Information was included in such Report. The information was obtained using the techniques and equipment used by GIA at the time of examination. Neither the information nor the Report is a guarantee or valuation. For additional information and important limitations and disclosures, please see GIA.edu/terms or call +1 800 421 7250 or +1 760 603 4500. The limitations and disclosures on the Report and in the client agreement with GIA governing the Report apply to the Information. By requesting GIA to provide this Information, you agree that you will not provide it to any person or entity without also providing the Report (or a copy of the Report).
