## GIA NATURAL DIAMOND GRADING REPORT

December 31, 2025

GIA Report Number ..... 6541317642  
 Shape and Cutting Style ..... Round Brilliant  
 Measurements ..... 7.45 - 7.48 x 4.56 mm

## GRADING RESULTS

Carat Weight ..... 1.58 carat  
 Color Grade ..... D  
 Clarity Grade ..... Flawless  
 Cut Grade ..... Excellent

## ADDITIONAL GRADING INFORMATION

Polish ..... Excellent  
 Symmetry ..... Excellent  
 Fluorescence ..... None  
 Inscription(s): GIA 6541317642

GIA REPORT  
 6541317642

## DIAMOND TYPE CLASSIFICATION FOR GIA DIAMOND GRADING REPORT #6541317642

Scientists classify diamonds into two main "types" - type I and type II - based on the presence or absence of nitrogen which can replace carbon atoms in a diamond's atomic structure. These two diamond types can be distinguished on the basis of differences in their chemical and physical properties. Type II diamonds contain little if any nitrogen and they are subdivided into two groups (IIa and IIb) both of which are quite rare (less than 2% of all gem diamonds).

According to the records of the GIA Laboratory, the 1.58 carat Round Brilliant diamond described in GIA Diamond Grading Report #6541317642 has been determined to be a **type IIa** diamond. Type IIa diamonds are the most chemically pure type of diamond and often have exceptional optical transparency. Type IIa diamonds were first identified as originating from India (particularly from the Golconda region) but have since been recovered in all major diamond-producing regions of the world.

Among famous gem diamonds, the 530.20 carat Cullinan I and the 105.60 carat Koh-i-noor are examples of type IIa.
