The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by International Gernological Institute (IGL.). A laboratory grown diamonal is one that has essentially the same chemical, physical and optical properties as of mixed admond. With the exception of being grown by the control of the properties of the properties of the control of the exception of being grown by ment currently available to IGL. Including, without limitation. IOX magnification, correct triplet loupe, binocular microscope, master color comparison stones, non-contact-optical measuring device, Diamond Sure* in Diamond View*. Spectraphotometer and such other instruments and/or processes as deemed appropriate by IGL. This Report includes a decimal properties of the spect to the importance of and interrelationship between cut, color, clarity and cara

Weight.
