Comments: This Chemical Vapor Deposition (CVD) laboratory grown

diamond is classified as Type IIa

This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laessrained9 by International Gemological Institute (GI). A LGD has essentially the chemical, physical and aptical properties as a mined alarman, with the exception of being man-made (a manufactured and product). LGD's are typically produced by CVD (chemical vapor deposition) or by HPHT (high pressure high temperature) growth processes and may include post growth modifications to change the color. Gil utilizes the most advanced techniques and equipment currently available including, binocular microscopes, alarmand color masters, non-contact-optical measuring device, a wide range analytical techniques including FIRE. UVS-NIR, raman sectoscopy, and fluorescence analysis at various aparameter, valuation are unablessed to the contact of the color of the
