LABORATORY GROWN DIAMOND REPORT

LG492136713
LABORATORY GROWN DIAMONE
ROUND BRILLIANT
8.37 - 8.42 X 4.92 MM

GRADING RESULTS

Dallah

Inscription(s)

Carat Weight	2.12 CARATS
Color Grade	
Clarity Grade	VS 1

Cut Grade IDEAL

ADDITIONAL GRADING INFORMATION

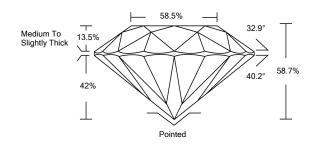

Polisn	EXCELLENT
Symmetry	EXCELLENT
Fluorescence	NONE

Comments: This Laboratory Grown Diamond was created by Chemical Vapor Deposition (CVD) growth process and may include post-growth treatment.

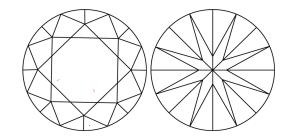

Type Ila

LABGROWN IGI LG492136713

The laboratory grown diamond described in this Report (Report') has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute (IGL1). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being grown by man (a manufactured product). IGLI employs and utilizes those techniques and equipment currently available to I.G.I. including, without limitation, 10X magnification, corrected triplet loupe, binocular microscope, master color companison stones, non-contract-optical measuring device, Diamond Sue³⁴. Diamond View³⁴, Spectraphotometer and such other vanced security features. A duly accredited gemologist or jeweler can advise you with respect to the importance of and interrelationship between cut, color, clarity and carat weight.
