This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Lasercribed® by International Gemological Institute (IGI). A LGD has essentially the chemical, physical and optical properties as a mined diamond, with the exception of being man-made (a manufactured product). IGI's Lasercribing process, by which a diamond is cut and polished to create a laser inscription (high temperature) growth processes that may include post growth modifications to change the color (color treatment) the most advanced techniques and equipment currently available including, binocular microscopes, diamond color masters, non-contact-optical measuring device, a wide range analytical techniques including FTIR, UV-Vis-NIR, raman spectroscopy, and fluorescence analysis at various excitation sources. This report is for informational purposes only. It is not intended to be used as a purchase or appraisal and by making the report IGI does not agree to purchase or replace the article.
