This technical diagram illustrates the proportions of a diamond. It features a central diamond shape with various facets labeled with percentages and angles. The top width is marked as 58.5%. The left side shows two vertical measurements: 14% for the upper portion and 42% for the lower portion, with a note 'Medium To Slightly Thick (Faceted)' pointing to the 42% section. The right side shows two angles: 33.8° for the upper facet and 40.2° for the lower facet, with a vertical measurement of 60.3% for the entire right side. The bottom point is labeled 'Pointed'.

Red symbols indicate internal characteristics.
Green symbols indicate external characteristics.

The laboratory growdiamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute (I.G.I.). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a naturally occurring diamond. The production of a grown diamond is a manufacturing process. I.G.I. employs and utilizes those techniques and equipment currently available to I.G.I., including, without limitation, 10X magnification, corrected triplet loupe, binocular microscope, master color comparison stones, non-contact optical spectrometer, and/or other instruments and/or processes as deemed appropriate by I.G.I. This Report includes advanced security features. A duly accredited gemologist or jeweler can advise you with respect to the importance of and interrelationship between cut, color, clarity and carat weight.

THIS REPORT IS NEITHER A GUARANTEE, VALUATION, NOR APPRAISAL OF THE GEMSTONE DESCRIBED HEREIN. PLEASE REVIEW THE LIMITATIONS AND RESTRICTIONS SET FORTH ONLINE. FOR MORE INFORMATION, PLEASE VISIT WWW.IGI.ORG OR CALL 1-888-BUY-IGI.
