

Comments: This Laboratory Grown Diamond was created by Chemical Vapor Deposition (CVD) growth process and may include post-growth treatment.
Type IIa

Diagram illustrating the cross-section of a diamond-shaped structure. The dimensions are labeled as percentages of the total width (100%):

- Top width: 66%
- Top thickness: 14%
- Left thickness: 45.5%
- Right height: 63.5%
- Bottom width: 100% (labeled as "Pointed")

Red symbols indicate internal characteristics.
Green symbols indicate external characteristics.

The laboratory grown diamond described in this Report ("Report") has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute ("IGI"). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a naturally occurring diamond except it was created by man (a manufactured product). IGI employs and utilizes those techniques and equipment currently available to IGI, including, without limitation, 10X magnification, corrected light tube, binocular microscope, master color comparison stones, non-confocal infrared spectroscopy, Raman spectroscopy, X-ray fluorescence spectrometry and such other instruments and/or processes as deemed appropriate by IGI. This Report includes advanced security features. A duly accredited gemologist or jeweler can advise you with regard to the importance of and interrelationship between cut, color, clarity and carat weight.

THIS REPORT IS NEITHER A GUARANTEE, VALUATION, NOR APPRAISAL OF THE GEMSTONE DESCRIBED HEREIN. PLEASE REVIEW THE LIMITATIONS AND RESTRICTIONS SET FORTH ONLINE. FOR MORE INFORMATION REGARDING OUR POLICIES, CONDITIONS, TERMS AND DISCLAIMERS, PLEASE GO TO WWW.IGI.ORG OR CALL 1-888-BUY-IGI.
