The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute (IGI). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a natural diamond. IGI is a company owned by a Jeweler (a Jeweler) (a manufactured product). IGI employs and utilizes those techniques and equipment currently available to IGI, including, without limitation, 10X magnification, corrected microscope, binocular microscope, master color comparison stones, non-contact measuring monochromator and/or spectrophotometer and/or such other instruments and/or processes as deemed appropriate by IGI. This Report includes advised security features. A duly accredited gemologist or jeweler can advise you with relevance the importance of and interrelationship between cut, color, clarity and carat weight.
