The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute (IGI). IGI's laboratory grown diamond grading system is a scientific name, chemical, physical and optical properties based system with the exception of the grading of color, clarity and cut (manufactured product). IGI employs and utilizes those techniques and equipment currently available to IGI, including, without limitation, 10X magnification, corrected optical microscopy, scanning electron microscopy, Fourier transform infrared spectroscopy, measuring device, Diamond Sure™, Diamond View™, Spectrophotometer and such other instruments and/or processes as deemed appropriate by IGI. This Report includes additional security features. A duly accredited gemologist or jeweler can advise you with relevance of the importance of and interrelationship between cut, color, clarity and carat weight.
