The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute (IGI). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a natural diamond. IGI employs and utilizes those techniques and equipment currently available to IGI, including, without limitation, 10X magnification, corrected line type, binocular microscope, master color comparison stones, non-contact, computerized refractometer, spectrometer, and/or other equipment and/or such other instruments and/or processes as deemed appropriate by IGI. This Report includes advanced security features. A duly accredited gemologist or jeweler can advise you with regard to the importance of and interrelationship between cut, color, clarity and carat weight.
