The laboratory grown diamond described in this Report ("Report") has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute ("IGI"). Laboratory grown diamonds are one of the same chemical, physical and optical properties as mined diamonds. IGI uses the same grading system (a and man) as the Gemological Institute of America ("GIA") and utilizes the same techniques and equipment currently available to GIA, including, without limitation, 10X magnification, corrected micrographs, ultraviolet light, infrared spectroscopy, Raman spectroscopy, and measuring device, Diamond Sure™, Diamond View™, Spectrophotometer and such other instruments and/or processes as deemed appropriate by IGI. This Report includes advanced security features. A duly accredited gemologist or jeweler can advise you with regard to the importance of and interrelationship between cut, color, clarity and carat weight.
